

The Ebtech Hum X is a powerline garbage filter: <http://www.ebtechaudio.com/humxdes.html>

The Behringer HD400 is an audio-line garbage filter:
<http://www.music-group.com/Categories/Behringer/Signal-Processors/DI-Boxes/HD400/p/P0387>

The powerline filter is always required on the amp or mixer, and the audio filter is always required before the amp/mixer.
Some, but not all, configurations, require the second powerline filter to the MIDI controller.
